# MEMO

---

**Date:** April 14, 2020

**To:**

**From:**

Katherine Kwiatkowski  
Regional Manager  
WRHA Patient Access and Transition Support

**Subject:** Oculys View-COVID19 cases

---

In order to better understand our current state and have a quick real-time snapshot of our system, Oculys has made the following changes outlined below with respect to viewing suspected and confirmed COVID cases.

IP&C is responsible for flagging COVID19 Suspect and COVID19 Positive cases in EPR. Once coded, the EPR feed is transferred and displayed in Oculys.

The “Susp-Covid19” column will count inpatients with an Infection Control code indicating the patient is suspected of having COVID-19.

The “Covid19” column will count inpatients with an Infection Control code indicating the patient has tested positive of having COVID-19.

**Please Note:** Oculys currently has not completed all of the deployment. They are still verifying COVID-positive data in EPR. Therefore, the COVID19 column on the main site screen is not displaying the true count of this patient population. However, the Unit Flow Board does contain the COVID19 alerts (see instructions below on how to view information)

Site Flow Board Display:

<b>CAMPUS STATUS</b> Green		Admits 3	Known DC/Pos DC 0/4	Available Beds 42	ALC 19	WTBS 11	Non-Admit > 24h 1	Admit > 24h 2

**Unit Flow Board Display:**

See example below displaying a COVID19 Positive patient. Note: A suspect will show as "COVID19 Suspect"

Hover over the "yes" in the "ALRT" column in order to verify the infection control status of the individual.

Current
