

The OSD team has created a **new addition to the Engagement Toolkit** specifically geared to offering support during a pandemic. Click [here](#) to access it.

In this new addition there are 3 sections:

- **Working and Leading from Home** is for both staff and leaders who are working remotely and offers resources to assist in adjusting to this new work environment.
- **Wellbeing in Difficult Times** offers resources to support physical, mental and emotional health and wellbeing.
- **Supporting Teams Through Crisis** aims to support leaders in their communication and leadership skills through crises such as this one.

OSD hopes this supplement to the **Engagement Toolkit** will be a source of support, regardless of what your work situation may be.
