

PRRT Request

Please see the following message with completion date by end of day May 21, 2020.

The Provincial Redeployment and Recruitment Team (PRRT) was established under the Shared Health/MHSAL COVID-19 Provincial Incident Command to centrally support and coordinate resource requests from SDOs. Since its inception, the PRRT has redeployed resources to support COVID-19 efforts including to OESH, hotel isolation accommodation, Health Links, etc.. As well, resource needs have been filled from the COVID-19 Casual Pool to multiple areas including the contact centre and Personal Care Homes. The priority is to fill requests for resources utilizing employees on the redeployment list prior to accessing the COVID-19 Casual Pool. Please know that if an employee is redeployed and you subsequently need that employee back, the PRRT will ensure that happens as expeditiously as possible.

As at May 15, 2020, the PRRT had outstanding requests for more than 20 employees to assist with outstanding needs related to COVID-19. There are multiple outstanding nursing resource requests and no nurses available on the redeployment list. The redeployment list being used by the PRRT is outdated.

The communication from Dr. Roussin and Lanette Siragusa dated May 12, 2020 required the following to be submitted to the PRRT:

1. A master list of all staff identified as available for redeployment. This list needs to represent your SDO's true availability, based on current bed census data and other service postponements or reductions related to COVID-19.
2. An updated version of this master list should be submitted on a weekly basis.
3. An updated version of this master list may be requested more frequently should an urgent COVID-19 resource request arise which the PRRT is unable to fill with staff available for redeployment. Should this occur, a Call Out for Eligible Staff will be issued and SDOs will be asked to update their lists with individuals who meet the required criteria/skills.
