***Ensure 6 months between dose # 1 and # 2 HBV/HPV**

Grade 6: Men-C- ACYW-135 catch-up

Grade 8: Tdap / Tdap-IPV or with fall 2024 clinics

Last Day of School: June 27, 2025

Minimum Spacing of Vaccine Doses

- Refer to [School-Based Immunization Quick Reference Guide- MB Health](#) (*ensure it is for the applicable school year)
 - **HBV** – All children born on or after January 1, 2006 in the Grade 6* school-based program that are 11-15** years of age are eligible for the 1.0 ml, 2 dose schedule Dose #1 and # 2 must be 6 months (24 weeks) apart. Refer to the above Quick Reference Guide for * details.
 - **HPV** Dose # 1 and dose # 2 must be 6 months (24 weeks) apart for 11-15 years of age - 2 dose schedule. Refer to the above Quick Reference Guide for details.
 - **Men-C-ACYW-135 vaccine** – All children born during or after January 2008 are eligible for one dose in the Grade 6 school-based program.
 - **Tdap** - if a student has received a booster dose of all components (T, d, and aP) after the age of 10, they do not need another dose until 10 years have elapsed. If they have previously received Td then they should be offered Tdap. If it has been > than 5 years since the last dose we would offer a dose at this time.
 - **Tdap –IPV** - Some students will require up to 3 doses of Tdap-IPV if there is no record of polio vaccine or if inadequate doses were received. If the student is forecast for further doses, the CA can decide whether to offer the additional doses or refer them to their HCP.
-
- **Influenza** - Children 6 months to less than 9 years of age receiving seasonal influenza vaccine for the first time in their life should be given two doses, with a minimum interval of four weeks between doses.
 - **COVID-19-**
After May 1, 2024, COVID-19 immunizations will not be broadly available until the Fall 2024 COVID-19 Immunization Program- MB Health
 - Refer to [COVID-19 Vaccine Quick Reference Guide for Immunizers- MB Health](#) (*ensure it is for the applicable season)
 - COVID-19 and concomitant administration as per Canadian Immunization Guide:
 - 6 months of age and older: COVID-19 vaccines may be given concurrently with (i.e. same day), or at any time before or after, non-COVID-19 vaccines (including live and non-live vaccines).
