

## **Bariatric/Non-Bariatric Safe Patient Handling & Movement and Falls Prevention Program**

OESH is pleased to present the following three courses to help prevent injuries in those staff members dealing with direct patient care. Please choose from the courses listed below.

### **Adult Patient Bariatric/Non-Bariatric Safe Patient Handling & Movement and Falls Prevention Program**

This program is mandatory for all employees involved in direct patient care for the adult patient. The following disciplines require this 8 hour day of training:

- ❖ Nurses
- ❖ Unit Assistants
- ❖ Physiotherapists
- ❖ Occupational Therapists
- ❖ Rehabilitation Assistants

### **Transport/Diagnostic Imaging Safe Patient Handling and Movement**

This special half day is intended for staff members that perform patient handling tasks, however do not require knowledge of the charting forms, including:

- ❖ Patient Equipment/Transport
- ❖ Diagnostic Imaging
- ❖ Outpatient Clinics
- ❖ Respiratory Therapists
- ❖ Speech Language Pathology and Audiology

### **Child Health Bariatric/Non-Bariatric Safe Patient Handling and Movement – Coming Soon**

This session is tailored specifically for transferring children. This will include all disciplines in the Child Health program that are involved in direct patient care, including:

- ❖ Nurses
- ❖ Unit Assistants
- ❖ Physiotherapists
- ❖ Occupational Therapists
- ❖ Rehabilitation Assistants

Please look for this course coming soon in 2010.
