

Electronic Patient Record Infection Control Code Quick Reference Sheet

Code	Explanation of Code	Precautions	Required Actions
AMR GNB P	AMR GNB Positive Antimicrobial resistant gram negative bacilli positive	Contact Precautions 	<ul style="list-style-type: none"> Notify site Infection Control Professional (ICP) Single room (do not cohort) Collect screening specimens as directed by site ICP
AMR GNB S	AMR GNB Suspect Antimicrobial resistant gram negative bacilli exposed (former roommate or bathroom-mate)	Routine Practices	<ul style="list-style-type: none"> Notify site ICP Collect screening specimens as directed by site ICP
CF	Cystic Fibrosis Diagnosis	Contact Precautions 	<ul style="list-style-type: none"> Single room (do not cohort with another CF patient) No screening specimen required
CN AUR POS	CN AUR Positive Multi drug resistant <i>Candida auris</i> positive	Containment Precautions 	<ul style="list-style-type: none"> Consult Infectious Diseases (ID) immediately Notify site ICP; leave a message after hours Single room (do not cohort) Collect screening specimens as directed by site ICP or Infectious Diseases on call after hours
CN AUR SUS	CN AUR Suspect Multi drug resistant <i>Candida auris</i> exposed (former roommate or bathroom-mate)	Containment Precautions 	<ul style="list-style-type: none"> Notify site ICP Single room (do not cohort) Collect screening specimen(s): <ul style="list-style-type: none"> axilla & groin -1 swab open wounds/lesions/incisions/ invasive device insertion sites
CPE POS	CPE Positive Carbapenemase producing <i>Enterobacteriaceae</i> (CPE) positive	Containment Precautions 	<ul style="list-style-type: none"> Notify site ICP; leave a message after hours Single room (do not cohort) No screening specimen required
CPE SUS	CPE Suspect Carbapenemase Producing <i>Enterobacteriaceae</i> (CPE) exposed (former roommate or bathroom-mate)	Containment Precautions 	<ul style="list-style-type: none"> Notify site ICP Single room (do not cohort) Collect screening specimens as directed by site ICP or Infectious Diseases on call after hours

Electronic Patient Record Infection Control Code Quick Reference Sheet

Code	Explanation of Code	Precautions	Required Actions
MRSA POS	MRSA Positive Methicillin resistant <i>Staphylococcus aureus</i> (MRSA) positive	Contact Precautions 	<ul style="list-style-type: none"> Collect screening specimen(s): <ul style="list-style-type: none"> nares open wounds/lesions/incisions/invasive device insertion sites
MRSA PREV	MRSA Previous: Methicillin resistant <i>Staphylococcus aureus</i> (MRSA) previous. Positive patient who was treated and eradicated or self-eradicated	Routine Practices	<ul style="list-style-type: none"> Collect screening specimen(s): <ul style="list-style-type: none"> nares open wounds/lesions/incisions/invasive device insertion sites
MRSA SUS	MRSA Suspect: Methicillin resistant <i>Staphylococcus aureus</i> (MRSA) exposed (former roommate or bathroom-mate)	Routine Practices	<ul style="list-style-type: none"> Collect screening specimen(s): <ul style="list-style-type: none"> nares and open wounds/lesions/incisions/invasive device insertion sites
MTB POS	MTB Positive Mycobacterium tuberculosis MTB positive Positive for active, infectious MTB	Airborne 	<ul style="list-style-type: none"> Notify site ICP Isolate in Airborne Infection Isolation Room (AIIR)
MTB Query	MTB Suspect Mycobacterium tuberculosis (MTB) is suspected and being investigated	Airborne 	<ul style="list-style-type: none"> Notify site ICP Isolate in Airborne Infection Isolation Room (AIIR) Collect specimens as directed by site ICP
RESP RISK	Do not use; this flag is scheduled for deletion	N/A	<ul style="list-style-type: none"> N/A

Electronic Patient Record Infection Control Code Quick Reference Sheet

Code	Explanation of Code	Precautions	Required Actions
VISA POS	VISA Positive Vancomycin intermediate <i>Staphylococcus aureus</i> positive	Contact Precautions 	<ul style="list-style-type: none"> Notify site ICP Single room (do not cohort) Collect screening specimens as directed by site ICP
VISA SUS	VISA Suspect Vancomycin intermediate <i>Staphylococcus aureus</i> suspect	Contact Precautions 	<ul style="list-style-type: none"> Notify site ICP Single room (do not cohort) Collect screening specimens as directed by site ICP
VRSA POS	VRSA Positive Vancomycin resistant <i>Staphylococcus aureus</i> (VRSA) positive	Contact Precautions 	<ul style="list-style-type: none"> Notify site ICP Single room (do not cohort) Collect screening specimens as directed by site ICP
VRSA SUS	VRSA Suspect Vancomycin resistant <i>Staphylococcus aureus</i> exposed (former roommate or bathroom-mate)	Contact Precautions 	<ul style="list-style-type: none"> Notify site ICP Single room (do not cohort) Collect screening specimens as directed by site ICP
VZV CASE	VZV Positive Varicella Zoster or Disseminated Zoster VZV positive	Airborne/Contact 	<ul style="list-style-type: none"> Notify site ICP Assign Immune roommates No specimens required
VZV CONF	Do not use; this flag is scheduled for deletion	N/A	<ul style="list-style-type: none"> N/A
VZV EXPSD	Do not use; this flag is scheduled for deletion	N/A	<ul style="list-style-type: none"> N/A
VZV SUSP	VZV Suspect Exposed to chicken pox or disseminated zoster and patient's chicken pox history is unknown	Airborne* 	<ul style="list-style-type: none"> Notify site ICP * Airborne Precautions during incubation period Assign immune roommates Collect blood specimen
