Panorama

What is it?
Why is it being implemented?
When is it being implemented?
Where to find more information?
What is Panorama

Panorama is a secure integrated web based ELECTRONIC PUBLIC HEALTH RECORD that supports:

- Immunization Management
- Vaccine Inventory Management
- Communicable Disease Investigations
- Outbreak Management
What is Panorama?

Panorama is a secure, integrated, web-based electronic public health record designed to assist public health practitioners to manage:

- Immunization
- Vaccine Inventory
- Communicable Diseases
- Outbreaks
Vaccine Inventory Management
Panorama is a national initiative that is aligned with provincial priorities. It allows for real-time surveillance and enables the identification of individual and population health needs. It will replace MIMS and IPHIS.
Vision
To improve disease prevention and reduce the impact of communicable diseases in the Manitoba population

Outbreak Management
Phase 1 will focus on immunization and inventory in the fall of 2014.

Phase 2 will focus on communicable diseases in the spring of 2015.

Phase 3 will focus on outbreaks in early 2016.

Why do we need Panorama?

Panorama:
- Is a national initiative that is aligned with provincial priorities
- Allows for real-time surveillance
- Enables the identification of individual and population health needs
- Will replace MIMS and IPHIS
