	Non-Smoker		e-Cigarette	Number, packs
	None		Other form	
	Occasional			
	Other			
	Pipe Smoker			
	Previous Smoker			
	Second Hand Smoke Exposure			
	Smoker in Home			
		Tobacco - Former User *this captures patients who <u>have quit</u> using tobacco however, had previously used tobacco at least 100 times in their lifetime.	Cigarettes	Number, packs
			Cigar/Pipe	Number, packs
			Spit/Chew	Number, packs
			e-Cigarette	Number, packs
			Other form	
		Tobacco - Never a User (Less than 100 times over their lifetime) *this captures patients who have used tobacco less than 100 times in their lifetime.	No exposure to Second Hand Smoke	
			Exposure to second hand smoke- home	daily, non-daily
			Exposure to second hand smoke- work	daily, non-daily
			Exposure to second hand smoke-other	daily, non-daily

Date Fields:

EMR '**Date**': This would be the date that the patient has reported that is relevant to the **beginning** of the status that the Provider is entering. Keeping in mind that the Provider can simply enter the month/year or just the year if that is all the Provider receives from the patient. For example, if entering Tobacco – Former User, enter the quit date in the Date field.

EMR '**End Date**': This would be the date that the patient has reported that is relevant to the **end** of the status that the Provider is entering. For example, if the patient has now quit and they had a status of Tobacco – Daily User, the Provider would enter the quit date in the End Date field and then enter the **beginning** of the status of Tobacco – Former User. Again, remember that you can simply enter the month/year or just the year if that is all you have.

	Approved By: <i>Primary Care Management Team</i>	Pages: <i>2 of 1</i>
	Approval Date: <i>September 9, 2015</i>	Supersedes: <i>March 9, 2015, November 2015</i>

Definitions

According to Health Canada (2012) [Canadian Tobacco Use Monitoring Survey \(CTUMS\) terminology](#) “Smoking status has been defined to be consistent with the definitions used in other national Health Canada surveys that collect data on tobacco use.

Tobacco Current User: includes daily tobacco and non-daily tobacco user (also known as occasional tobacco users) **who have not** quit.

Tobacco - Former User - In the *EMR ‘Lifestyle band’ “Tobacco – Former User”* This captures patients who have quit using tobacco however, had previously used tobacco at least 100 times in their lifetime.

Tobacco - Never a User (Less than 100 times over their lifetime) - In the *EMR ‘Lifestyle band’ “Tobacco Never a User (Less than 100 times over their lifetime)”* this captures patients who have used tobacco less than 100 times in the patient’s lifetime.”

IMPLEMENTATION:

Effective September 9, 2015 - Any ‘Disability’ or ‘Stress’ items that are currently associated with a patient’s chart in the Lifestyle band will remain as is, but the option to select ‘Disability’ or ‘Stress’ under the Lifestyle band has been removed as per Clinical Advisory Group September 2015

Effective October 12, 2015 - The Lifestyle band within the EMR is changing to incorporate the national standards regarding tobacco cessation. As of this date, all new histories will be mapped to the Primary Care Quality Indicators (PCQI).
