

Hearing Conservation (Audiometric Testing for new HSC employees)

Baseline Audiometric testing will be provided for all new employees working in identified areas of noise level concern within 6 months of hire as per the Manitoba Workplace Health & Safety Regulation (MR 217/2006) Part 12.

The Occupational Health Nurse (OHN) will send the Audiometric Contractor a list of new hires & transfers. (Winnipeg Hearing Center - Bria Jackson bria@winnipeghearing.com)

Audiometric Contractor

- Contact Department Managers by email and provide available dates for testing.
- Forward all baseline audiometric results to the HSC OESH General Mailbox.

Normal Audiogram Results

OHN to file audiogram in the Employees' Confidential Occupational Health File.

Abnormal Audiogram Results

Audiometric Contractor will send a referral form to an Audiologist for employees that require further testing.

The Audiometric Contractor will email oesh_hsc@wrha.mb.ca a letter outlining the results of further testing performed by the Audiologist.

The OHN will file all correspondence in the employee confidential files.
